

Abdullah Umar

Software Engineer | Data and Systems Enthusiast

abdullahumarch000@gmail.com | +923074532359 | LinkedIn | Portfolio

Summary

Backend Developer with strong experience in designing and deploying scalable APIs and automation solutions. Skilled in Mern, NodeJS, NextJS, Flutter, Python, PostgreSQL, and MongoDB with a focus on performance, security, and clean architecture. Solid understanding of OOP and data structures, enabling efficient and maintainable codebases. Highly adaptable, collaborative, and committed to integrating AI and modern technologies into production-grade systems. Also proficient in managing and growing digital presence across major social media platforms including YouTube, LinkedIn, TikTok, and Instagram.

Education

University of Central Punjab	Lahore, Pakistan
Bachelor's in Computer Science	2021 – 2025
Main coursework: DSA, DB, MAD, ML, ST	CGPA 3.18/4.0

Technical Skills

- **Languages:** JavaScript, Python, Flutter
- **Vocal Languages:** Fluent English, Fluent Urdu
- **Frameworks & Tools:** Mern, NodeJS, NextJS, NestJS, Django
- **AI Use:** chatgpt/ claude
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Concepts:** REST APIs, Serverless, Authentication, CI/CD
- **Social Media Management:** YouTube, LinkedIn, TikTok, Instagram
- **Other:** Git & GitHub

Professional Experience

Netsol <i>Intern Software Engineer</i>	Lahore- Onsite Apr 2025 –Aug 2025
• Built applications using Flutter and Firestore. • Designed backend architectures, and managed real-time sync across Android & iOS. • Owned feature lifecycles from data modeling to deployment, collaborating with design and product teams.	
Telco <i>Sales Executive</i>	Lahore-Onsite Aug 2025 – Oct 2025
• Best speaking and engaging skills for customers. • Fluent in English • Meeting skills pro active reply	
TieTech <i>Associate Software Engineer</i>	Lahore-Onsite Nov 2025 – present
• Working as an Associate Software Engineer, building web applications using the MERN stack and gaining experience with PostgreSQL for database management. Focused on strengthening my development skills, writing efficient code, and learning new technologies along the way.	

Projects

LeafDetect ProCare <i>Flutter, FastApi, Machine learning, Python, Gemini</i>
• Flutter-Based Plant Leaf Disease Detection app using TensorFlow Lite for real-time disease detection.
RangrazStudio <i>Python, Django, Html, CSS</i>
• Shopping happily in easy to purchase clothing store. • Integrated Gmail, Whatsapp for notifications and updates
ML <i>Python, Web scraping, Data collections</i>
• Designed and implemented multiple machine learning solutions using Python for real-world applications such as customer segmentation, medical diagnosis, and real estate price prediction. Applied algorithms like K-Means clustering, Linear Regression, and K-Nearest Neighbors (KNN) on large-scale Kaggle datasets. Performed data cleaning, feature engineering, and model tuning using Pandas and Scikit-learn. Deployed and evaluated models with performance metrics to ensure reliability and scalability.

Certificates

- Python crash course from PNY trainings Arfa kareem
- Business law courses from CourseEra
- Programming Courses from CourseEra

Community Work

- Worked in many societies during my university. Participated in many social works like member of Al-Khidmat foundation, planting campaigns.
- Volunteer and Team lead in various activities in university and social.
